

Lab Activity 4

Submission Deadline: 17 September 2021 -5.00PM (Moodle Submission)

Topic: DOM Manipulation

Activity:

Create a to-do list maker with the following features:

1. Make an input box and a <p> tag. The text within the p tag should change **as and when** you type in the input box. **(10)**
2. Button for adding an item to the list which should add the content from the above <p> tag to the list. **(10)**
3. Append the timestamp when the item was added at the end of each item. **(5)**
4. Button for removing the last item added from the list. **(10)**
5. The list item should get highlighted upon hovering the mouse pointer on it and it should become as it was upon moving away the mouse pointer from it. **(5)**
6. A button for changing the font family of the list items only. (Clicking it again should bring the original font back) **(10)**

Directory Structure:

Create a folder with your <roll_no>, within it:

Create an index.html file which will contain the html code.

Create styles folder and put your css file(s) in it.

Create a scripts folder and put your js file(s) in it.

If used any images, create an images folder and put your image(s) in it.

Create a readme.md file (optional).

Note:

External CSS/JS libraries are strictly not allowed.

Do not use inline css/js.

Strictly follow above mentioned directory structure.

Partial marks will not be awarded for any subtask.

Mention your assumptions in a readme.md file (optional).

Submission guidelines:

Zip the <roll_no> folder as <roll_no>.zip
